PROFILE

I am currently pursuing a Master of Computer Applications (MCA) degree at Dr. Hari Singh Gour University (DHSU), Sagar, building upon my foundational education in computer science. I have completed my Bachelor of Computer Applications (BCA) from the same university, which gave me a strong grounding in various programming paradigms and software development techniques.

PROJECTS

BoltalIndia

PHP

BoltalIndia is a vibrant Hindi news and opinion blog covering trending topics, politics, entertainment, and social issues. It connects readers with timely updates and engaging commentary, reflecting regional culture and national interests. The platform thrives on community interaction and digital storytelling to keep audiences informed and involved.

File Arrangement

Java

The main class, Arrange, takes a directory path, verifies it, and then transfers files into subfolders named after the first character of each file, creating the folders if they don't exist. The program processes the files with a delay for demonstration and prints status messages.

Bundelicrafts

Python

Bundelicrafts is an ecommerce website built using Django that specializes in arts and crafts handmade products. It provides artisans a platform to showcase and sell their unique handmade items directly to customers. The site offers features like product catalogs with high-quality images, secure payment gateways (such as Stripe), order management, and customer support.
